My History

Staff Software Engineer - AI DevX — Ramp (Jan 2026 - Present)

- **Agents for developer productivity -** Building agents for internal developer productivity.
- **AI On-Call Assistant -** Worked on OCA, Ramp's AI On-Call Assistant.
- **Software factory -** Building the software factory for Ramp's FDE team.

Staff Software Engineer - Developer Platform — Hume AI (Sep 2024 - Jan 2026)

- I introduced new developer products (`hume-cli`, `hume-mcp-server`, `hume-proxy`), did design for the developer API, generated SDKs using Fern, troubleshooted hundreds of user issues in Discord, and built demos/examples/docs on topics ranging from the fundamentals of audio, to the dark parts of Apple audio APIs, to lip syncing, to “hello world” React Native example apps.

Software Engineer - Developer Experience — Stripe (July 2019 - Sep 2024)

- **SDKs -** Architected and shipped major improvements and features to Stripe’s server-side SDKs: type annotations, async support, instrumentation, predictable naming, testability, and more.
- **SDK generator -** Improved and expanded Stripe's SDK generator from prototype to robust infrastructure.
- **API Review -** Consulted on RESTful API design across the Stripe API

Previous Experience

- **Vimeo** (Oct 2017 - July 2019) - Lead Engineer, Developer Experience and Live Platform teams. Managed up to 5 reports; cut CI times in half; delivered "simulcast" and "scheduled live event" features to Vimeo Live.
- **Livestream** (Feb 2015 - Oct 2017) - Software Engineer, API Team. Shipped features related to discovery, syndication, billing, authentication, and more.

Get to know me

- I write occasionally about software topics that interest me.

Education

Washington and Lee University — Lexington VA (May 2014)

- B.S. Computer Science (with honors) / B.A. Economics
- Minor in Mathematics
- Magna cum laude
